Introduction Immobilizer System – The training manual Immobilizer System is divided into the following main chapters: – Overview – Components – Variants NOTE: The data, tables and procedures represented in this training manual serve only as examples.

### Immobilizer System - 2015

2015 Immobilizer System - This document provides information on the immobilizer system for the 2015 vehicle. It covers the components, variants, and procedures for the system. The system is designed to prevent the engine from starting without the correct key. The document includes a table of contents and a list of components. The system is controlled by the immobilizer control unit (ICU) and the immobilizer control module (ICM). The ICU is located in the engine compartment and the ICM is located in the driver's footwell. The system uses a transponder key to communicate with the ICU and ICM. The key contains a unique code that is stored in the ICM. When the key is inserted into the ignition, the ICM sends a signal to the ICU, which then allows the engine to start. If the key is not recognized, the engine will not start. The document also includes a list of variants for the system, including the immobilizer system with a transponder key and the immobilizer system with a remote keyless entry (RKE) system. The RKE system allows the driver to lock and unlock the vehicle using a remote key. The document provides detailed information on the components, variants, and procedures for the immobilizer system. It is intended for use by technicians and other qualified personnel. The information in this document is for informational purposes only and should not be used as a substitute for proper training and safety procedures. Always use the correct tools and techniques when working on the immobilizer system. If you are unsure of any procedure, consult the factory service manual or a qualified technician. The information in this document is subject to change without notice. © 2015 Ford Motor Company. All rights reserved.
