

database management systems 3rd pdf

A database is an organized collection of data, generally stored and accessed electronically from a computer system. Where databases are more complex they are often developed using formal design and modeling techniques.. The database management system (DBMS) is the software that interacts with end users, applications, and the database itself to capture and analyze the data.

Database - Wikipedia

A configuration management database (CMDB) is a database that acts as a data warehouse for storing a range of relevant information about hardware and software assets (commonly referred to as configuration items (CI)) in an organisation, as well as the relationships between them. The repository provides a means of understanding the collection of critical assets and their relationships, such as ...
