A foundation is the element of a structure which connects it to the ground, and transfers loads from the structure to the ground. Foundations are generally considered either shallow or deep. Foundation engineering is the application of soil mechanics and rock mechanics (Geotechnical engineering) in the design of foundation elements of structures.

Foundation (engineering) - Wikipedia

As the building industry evolves, it's constantly developing ways to create building materials and methods that can allow construction to be done in the most efficient way possible.
