

### **human evolution and culture pdf**

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates – in particular genus Homo – and leading to the emergence of Homo sapiens as a distinct species of the hominid family, the great apes. This process involved the gradual development of traits such as human bipedalism and language, as well as ...

### **Human - Wikipedia**

Human evolution is a rapidly-changing field, with the regular discovery of new fossil material leading scientists to constantly reconsider evolutionary relationships. This section is an overview of current knowledge of human ancestors, but also presents information on trends in human evolution and the use of DNA technology to examine our past history.
