Mechanical ventilation or assisted ventilation is the medical term for artificial ventilation where mechanical means is used to assist or replace spontaneous breathing. This may involve a machine called a ventilator, or the breathing may be assisted manually by a suitably qualified professional (such as an anesthesiologist or paramedic) compressing a breathing system, bag valve mask device or ...

Adults are infectious from as early as 24 hours before the onset of symptoms until about seven days thereafter. Children are even more contagious: young children can shed virus for several days before the onset of their illness and can be infectious for > 10 days ( ). Severely immunocompromised persons can shed influenza virus for weeks or months (Klimov 1995, Boivin 2002).

Foot drop is a gait abnormality in which the dropping of the forefoot happens due to weakness, irritation or damage to the common fibular nerve including the sciatic nerve, or paralysis of the muscles in the anterior portion of the lower leg. It is usually a symptom of a greater problem, not a disease in itself. Foot drop is characterized by inability or impaired ability to raise the toes or ...
