In genetics, a mutagen is a physical or chemical agent that changes the genetic material, usually DNA, of an organism and thus increases the frequency of mutations above the natural background level. As many mutations can cause cancer, mutagens are therefore also likely to be carcinogens, although not always necessarily so. All mutagens have characteristic mutational signatures with some ...

Ancient rock paintings, which date back 5000 years, have been found in the northern part of Somalia. These engravings depict early life in the territory. The most famous of these is the Laas Geel complex. It contains some of the earliest known rock art on the African continent and features many elaborate pastoralist sketches of animal and human figures.
