Category:Human physiology - Wikipedia

The human body is the structure of a human being. It is composed of many different types of cells that together create tissues and subsequently organ systems. They ensure homeostasis and the viability of the human body.. It comprises a head, neck, trunk (which includes the thorax and abdomen), arms and hands, legs and feet. The study of the human body involves anatomy, physiology, histology and ...

Human body - Wikipedia

Homeostasis Positive and Negative Feedback When a change of variable occurs, there are two main types of feedback to which the system reacts: • Negative feedback: a reaction in which the system responds in such a way as to reverse the direction of change.
