Human sexuality is the way people experience and express themselves sexually. This involves biological, erotic, physical, emotional, social, or spiritual feelings and behaviors. Because it is a broad term, which has varied over time, it lacks a precise definition. The biological and physical aspects of sexuality largely concern the human reproductive functions, including the human sexual ...

The human brain is the central organ of the human nervous system, and with the spinal cord makes up the central nervous system. The brain consists of the cerebrum, the brainstem and the cerebellum. It controls most of the activities of the body, processing, integrating, and coordinating the information it receives from the sense organs, and making decisions as to the instructions sent to the ...

The normal function of the urinary bladder is to store and expel urine in a coordinated, controlled fashion. This coordinated activity is regulated by the central and peripheral nervous systems. [] Neurogenic bladder is a term applied to urinary bladder malfunction due to neurologic dysfunction emanating from internal or external trauma, disease, or injury.

The Apoe tm1Unc mutant strain was developed in the laboratory of Dr. Nobuyo Maeda at The University of North Carolina at Chapel Hill. The 129P2/OlaHsd-derived E14Tg2a ES cell line was used. The plasmid used is designated as pNMC109 and the founder line is T-89 in the primary reference.

Generation of genetically uniform non-human primates may help to establish animal models for primate biology and biomedical research. In this study, we have successfully cloned cynomolgus monkeys (*Macaca fascicularis*) by somatic cell nuclear transfer (SCNT). We found that injection of H3K9me3 demethylase Kdm4d mRNA and treatment with histone deacetylase inhibitor trichostatin A at one-cell ...

1. Introduction. Temperature is a critical variable in health and disease. Constraint of human body core temperature within a degree or two of 37 °C, which is the optimal temperature for normal cellular function, occurs in three ways. The first is stable climate, which maintains temperatures across most of the surface of planet Earth within a range compatible with human life.
