

rice crop protection guide pdf

Rice, a monocot, is normally grown as an annual plant, although in tropical areas it can survive as a perennial and can produce a ratoon crop for up to 30 years. Rice cultivation is well-suited to countries and regions with low labor costs and high rainfall, as it is labor-intensive to cultivate and requires ample water.

Rice - Wikipedia

DuPont Crop Protection works hard to understand the needs of growers as they rise to the challenge of feeding a growing world. We use inclusive thinking to create answers in insect, weed and disease control that help growers improve the quality and yield of their crops, and the productivity and sustainability of their farming operations.

Agriculture is the cultivation of land and breeding of animals and plants to provide food, fiber, medicinal plants and other products to sustain and enhance life. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The study of agriculture is known as agricultural ...

THE ROLE OF TECHNOLOGY IN AGRICULTURE - DuPont Food Security

Climate-smart agriculture (CSA) goes beyond new technologies and practices like drought resistant varieties or precision farming. To achieve the multiple objectives of productivity and food security, enhanced farmer resilience and reduced greenhouse gas emissions, CSA must adopt various systems perspectives. These include landscapes and ecosystems, as well as value chains.
