Woodworking Project Ideas To Keep You Building

In joinery, a groove is a slot or trench cut into a member which runs parallel to the grain. A groove is thus differentiated from a dado, which runs across the grain.. Grooves are used for a range of purposes in cabinet making and other woodworking fields. Typically, grooves are used to house the panels in frame and panel construction and the bottoms of drawers.

Groove (joinery) - Wikipedia

A router is a hand tool or power tool that a worker uses to rout (hollow out) an area in relatively hard material like wood or plastic. Routers are mainly used in woodworking, especially cabinetry. Routers are typically handheld or fastened cutting end-up in a router table. The hand tool type of router is the original form. It is a specialized type of hand plane with a broad base and a narrow ...

Router (woodworking) - Wikipedia
